Ankeny, IA 50021

Time: 9:00 A.M. to 3:30 P.M.

Cost: \$135 (includes lunch)

Does your organization want to:

- reduce costs?
- reduce liability?
- improve market position?

We will show you how an EMS can benefit your organization!

In 2014 & 2015, Pollution Prevention Services hosted 1-day “EMS In Depth” workshops for Iowa environmental professionals. Due to popular demand this workshop series continues and offers another step in the development of your environmental management system.

*EMS In Depth: Conducting Quality Internal Audits* will be focused on one of the most challenging components of EMS – auditing the effectiveness of your own EMS. During the workshop there will be dedicated times for instruction, open interaction with the presenter and networking amongst attendees, to encourage the exchange of different ideas and approaches. Future workshops in this *EMS In Depth* series will focus on other identified portions of the EMS process which are determined in part on attendee feedback and requests.

Leading the workshop will be Cory Sander of PSARA Technologies, Inc. Cory has led our previous *EMS In Depth* workshops and has extensive experience developing, implementing, and maintaining ISO 14001 and other EMS for numerous organizations including Honda, Ford, BNSF Railway, the City of Columbus, and Iowa DNR.

Comments from previous EMS In Depth workshops:

- *Excellent workshop. Loved all of the interaction with everyone. Great presenter.*
- *Exceeded expectations! Attended Aspects & Impacts workshop in 2014 and this lived up to value.*

Due to reduced outside program funding the registration for this workshop reflects the full cost of the workshop facility and the presenter. As with all workshops in this series, we hope that this workshop will continue to exceed attendee expectations while providing excellent value.
